| Kind of illlumination:     | Single-LED  |
| Hints:                     | The specified 6 V DC, 24 V DC Bi-colour; 130 V AC, 130 V DC and 230 V AC versions are built with a protection diode<br>The specified 12, 24, 28, 48 VAC/DC versions are built with a bridge rectifier<br>The specified 130 VAC types are developed to run on a supply voltage of 130 VAC only<br>An operation at a higher supply voltage using commercial lampholders with<br>integrated resistors, is not approved<br>If the 24VDC Bi-colour lamp is driven with normal polarity (plus on middle contact<br>of the lamp) the first mentioned colour will light up, with inverted polarity the<br>second colour will ligth up<br>The luminous intensity stated is for when used with DC |

Electrical and optical data are measured at 25 °C Luminosity and wave length variations caused by LED manufacturing processes may cause slight differences regarding the illumination. The customer has to decide what resistor shall be used to the LED
